Searching… ⚙	OPN2005_086D Not Paired
Now Discoverable	Now Discoverable
It's searching but not found	*It's found, but not pairing*
Steps to do:

1. Hold down clear/function key (smaller of the two buttons) until LED flashes blue

2. Tap on the **<u>OPN2005</u>** line item within the Bluetooth Settings devices listing (initially it will show up as a keyboard)
OPN2005 is found:
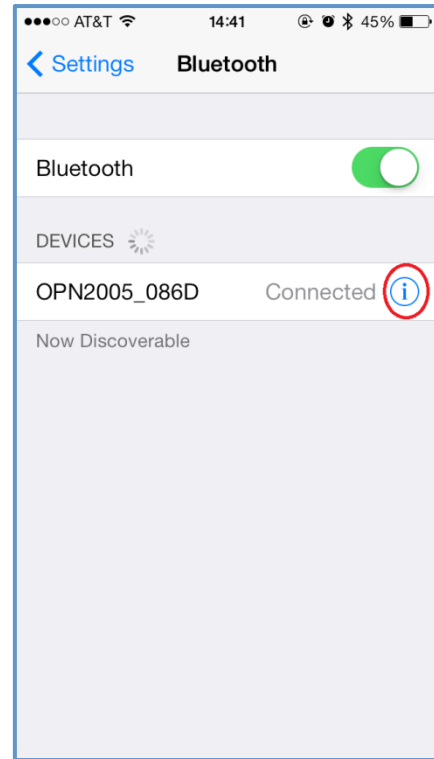

If the OPN device is showing up, it should pair up:

It's searching …   *It's found and paired correctly*
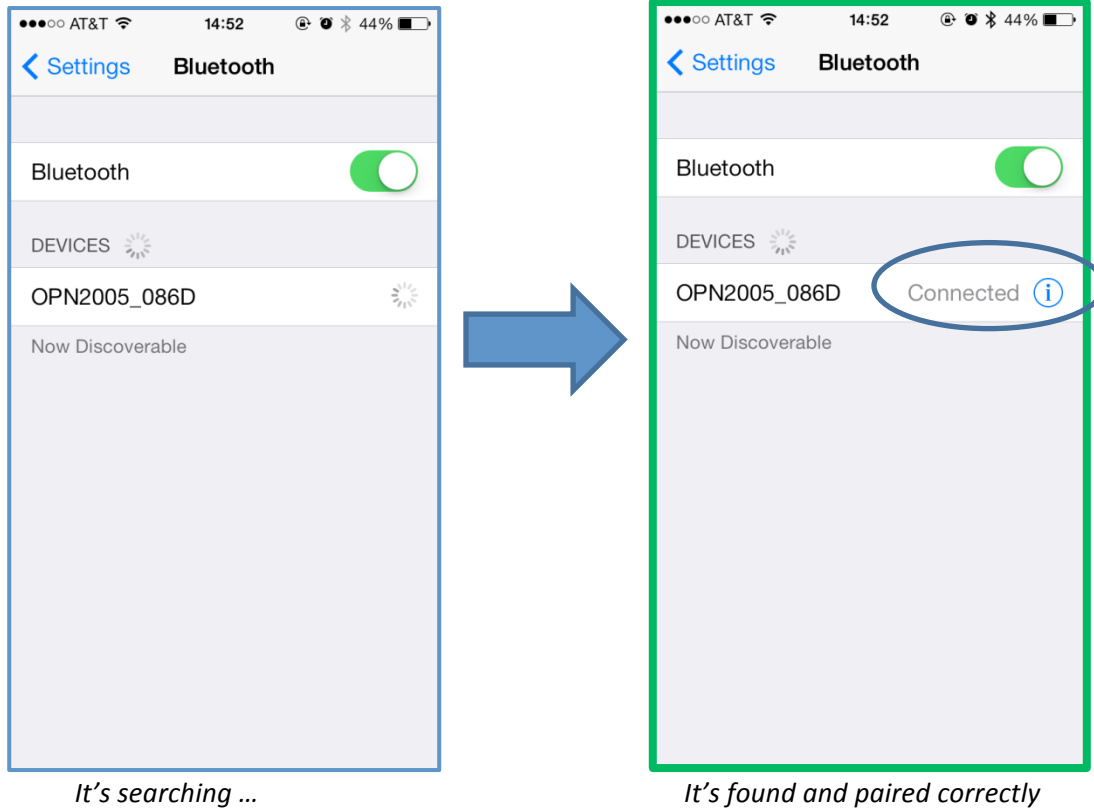

A connection should take place and the screen should display "Connected" when paired.

OPN2005 is found, but not connecting:

If the OPN device is showing up, but it still will not connect:

OR..

Steps to do:
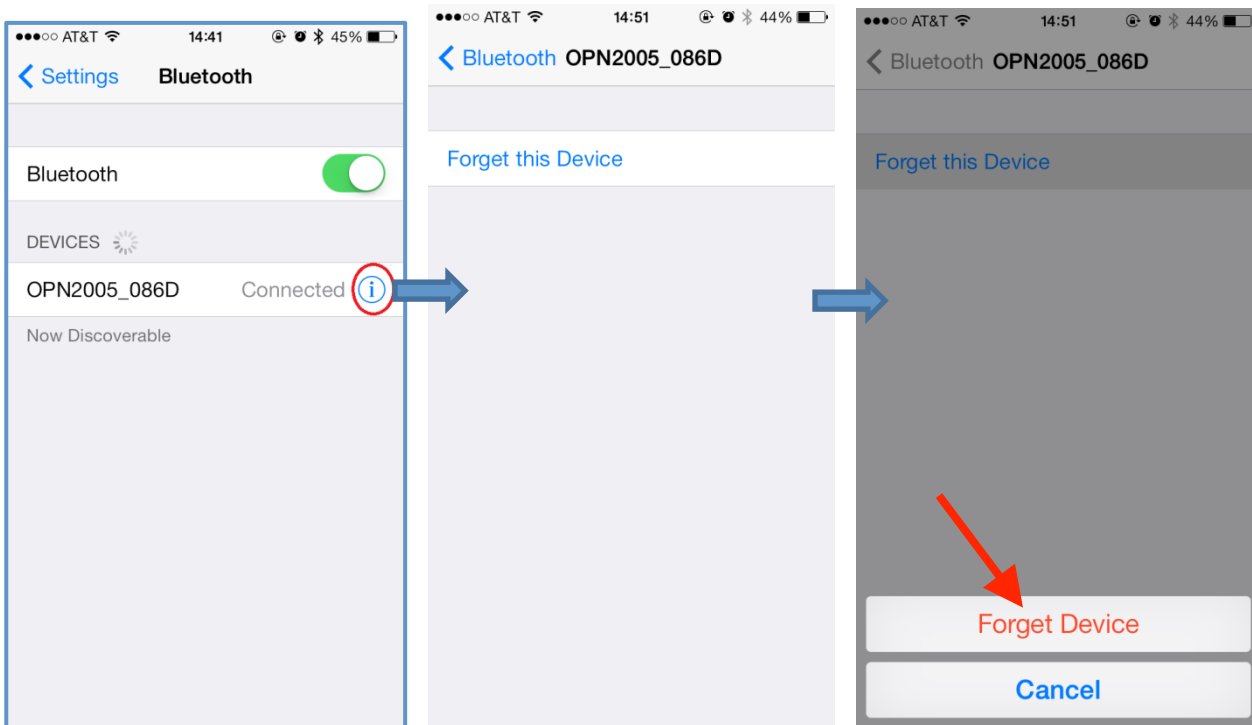

1. Hold down scan/trigger button (larger of the two buttons) until LED flashes blue…wait until connected OR…

2. Forget device by tapping on the blue ⓘ at the OPN2005 line item…

Forgetting the Device:

Sometimes it may be necessary to forget the device in memory and start fresh

Steps to do:

1. Forget device by tapping on the blue ⓘ at the OPN2005 line item…
2. Click on "Forget Device"
3. Then re-pair the device using the Quick Start Guide which came with your device.

Reset the OPN Device:

Should these steps not produce a connection, the OPN2005 device may benefit from an internal reset.

This is performed by holding down *both* the scan/trigger button *and* clear/function button for approximately 25-30 seconds (ignore any LED flashes or tones for this duration).   Then attempt the repairing processes.

25-30 Sec
