

OPN2002

Quickstart Guide for BlackBerry® Playbook® HID

STEP ONE

Scan the code at right to choose Bluetooth-HID (Keyboard)

STEP TWO

Scan the code at right to choose BlackBerry Playbook mode.

STEP THREE

Hold the Clear/Function key (see diagram above) on the OPN2002 for five seconds, until it beeps and the LED begins flashing blue.

STEP FOUR

In BlackBerry® Playbook®, from Home Screen > *Settings* *Incon* > *Bluetooth*®. Make sure *Bluetooth*® is ON. Click > *Add New Device*. Select *OPN2002*, then *Yes*, if prompted.

Once chosen, the OPN2002's laser will light up and you will hear a steady beep. To scan the PIN on the Playbook's screen, use the number barcodes provided on the right, one number at a time. When you are done, scan 'END' to complete the pairing.

STEP FIVE

Your OPN2002 is now paired. Any barcode data you scan will now appear on the screen as if you had typed it.

Note, if for any reason your OPN2002 becomes unpaired with your other device (e.g. the Playbook® goes to sleep, suffers power loss, etc.), you can simply hold the scan key for five seconds to re-establish the connection.
